# Fingerprint Flowers

## Supplies

- A selection of coloured paints
- Blue or green paper or card
- Lolly stick

- 1 First, take the paper or card and lay it out landscape. Now, dip a fingertip into yellow paint and print 5 or 6 yellow dots, evenly spaced, going across the page. The dots need to be about halfway up the paper. Then wash or wipe your finger so that it is clean of paint.

- 2 Dip the long edge of the lolly stick into green paint. Then use this to print some stems coming down from each yellow spot to the bottom edge of the paper.

- 3 Now create some grass going along the bottom of the paper. To do this, dip a fingertip into the green paint, then place the finger just above the bottom edge of the paper and drag it down. Repeat until there is a row of grass going along the full length of the bottom of the paper. Then wash or wipe your finger so that it is clean of paint.

- 4 Finally, make petals to go on your flowers! Do this by dipping your fingertip into some paint, then print circle shapes going around the outside edge of each yellow print. Repeat until all of the flowers have got petals; you may want to use different colours or make a repeating pattern.
