### Nursery Maths Week 3: One More

This week we will be gaining an understanding of the concept '**one more**' when adding to a given amount.

Attached is a link to an online teaching lesson entitled '**Finding one more than a given number**'. It is aimed at slightly older children so feel free to adapt the activity for your child based on their current counting ability.

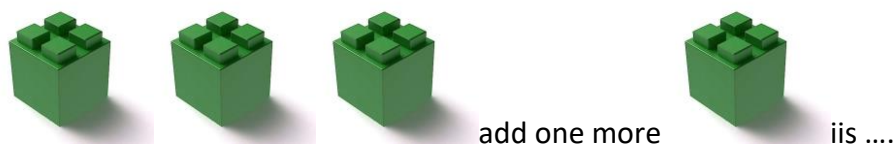

<https://classroom.thenational.academy/lessons/finding-one-more-than-a-given-number/activities/1>

When working out one more than a given amount we recommend having a visual number line present to refer to.

As well as the use of 'objects', so that your child can physically count the objects to gain an awareness and understanding of adding one more to the given amount.

Example...

Remember to use the number sentence when working out the total amount...

**"one more than ? is ?"**
