

Countdown

How to play countdown: The number in black is your target number. You need to reach this number by using only the cards available below it. You can only use the numbers once, unless there are two cards with the same number, for example there are two 1s in question 2, so you can use 1 two times. You don't have to use all the cards; you can use as many as you need. You can use all 4 operations: \times / $+$ - to reach your target number. If you get one combination of the target number, then try another one. There is not just one answer.

1.

423

50	2	7	10	1	7
----	---	---	----	---	---

2.

172

25	6	6	4	1	5
----	---	---	---	---	---

3.

315

50	9	5	4	8	7
----	---	---	---	---	---

466

25	8	6	10	7	2
----	---	---	----	---	---

4.

173

25	10	8	3	7	4
----	----	---	---	---	---

5.

786

100	8	2	7	3	1
-----	---	---	---	---	---
